CEEES NEW YEARS MESSAGE

December 2011

Dear Members of CEEES
Dear Colleagues and Delegates of the National Societies

We already look back to the year 2011 full of important events in economy, finance and technology. The gain of knowledge and experience we constantly try to apply to future projects and developments.

In 2024 we might be part of 8'000'000'000 human beings on the world. Unevenly distributed of course with high increase rates south of the equator. Space and food for living of another 10^9 human beings has to be granted. Products affordable and sustainable to be bought or shared in communities have to be developed. This is the part where CEEES fits in.

Our National Societies have the knowledge of experts to support future developments of sustainable products. Overlapping our different skills – as some National Societies already do by creating teams of experts coming from different fields - will even strengthen our position and ability to support industry.

I look forward to meet delegates from all National Societies in our next meeting 15th -17th of February in Liège / Belgium.
National Societies which are not able to send delegates are kindly requested to send their input for the meeting directly to sekretariat@svu.ch

I hope you have a Merry Christmas with your families and friends and I do wish you a prosperous NEW "2012" YEAR .

Yours Sincerely

Werner Wittberger
Acting President CEEES
